

ARM Academy

FREE ARM Software Webinars

December Webinars

Join us for sessions on "winterizing" ARM for the end of a research season, finding trials with the study list, and learning about study rules. The latter provides the first look at big changes we're adding for rules!

Winterize your ARM Thu. Dec 8 at 9 am CST

We present some tips and tricks to "winterize" your software to capture (and share) your settings and configurations in ARM.

Search ARM files with the Study List Thu. Dec 15 at 9 am CST

We demonstrate the study list tool for searching through your ARM files. This is one of the more under-utilized features in ARM!

Study Rules - Getting Started Thu. Dec 22 at 9 am CST

We cover the basics of ARM study rules, with both trialists and protocol writers in mind. This is also a first look at the re-designed Rules editor!

Study Rules - Going Further Thu. Dec 29 at 9 am CST

A deeper look at all of the rules that are possible for ARM trials. We introduce the new Conditional rules in this session as well!
