ARM Academy

ARM Primer: 2021

Prepare for the upcoming research season with ARM webinars! This series focuses on starting the year off on the right foot with ARM. With shortcuts and new features and maybe some new-to-you capabilities, there's something for ARM users of all experience levels!

What's different in ARM this year?   Thursday, March 4 at 10 AM CST
We will demonstrate what changes have been made to ARM since the beginning of last season. This covers ARM release versions 2020.0 through 2020.5 - check out the next webinar to learn about the 2021.0 update.

What's new in the latest ARM?   Tuesday, March 9 at 10 AM CST
We will demonstrate what has been added to ARM in the latest version, ARM 2021.0. Highlights include analysis from Column Diagnostics into reports, and new & updated calculations for certain situations.

Dusting off your ARM for the season   Thursday, March 11 at 10 AM CST
We present some tips and tricks to "dust off" your software to prepare for the upcoming research season. Those attending our Winterize session will recognize some topics, but may benefit from the refresher and add'l subjects.

Applications and Spray Sheets   Monday, March 15 at 10 AM CDT *note time change
Tips for documenting treatment applications, and common troubleshooting steps for creating a "spray sheet" Spray/Seeding Plan report!

Master the Treatments Editor   Wednesday, March 17 at 10 AM CDT
We present shortcuts and tricks to save time filling out the treatments list in ARM studies.
Topics include: keyboard shortcuts, validation list searching, sharing product lists, and study rules for treatments.

ARM Primer: 2021

Prepare for the upcoming research season with ARM webinars! This series focuses on starting the year off on the right foot with ARM. With shortcuts and new features and maybe some new-to-you capabilities, there's something for ARM users of all experience levels!

Improve study design with the Power & Efficiency planner   Tuesday, March 23 at 10 AM CDT

We introduce the Power & Efficiency planner in ARM. This tool helps design trials with a sufficient number of treatments and replicates to detect expected differences. We explain how to enter your statistical parameters and the questions this tool can help answer to assist in trial planning.

Improve this year's data with Study Rules now   Thursday, March 25 at 10 AM CDT

A repeat from last fall's webinar, we discuss the practical aspects of getting started with study rules. Now is the time to implement this powerful feature, to simplify the interim data review process and to improve trial quality!

Multi-Factor Experiments in ARM   Monday, March 29 at 10 AM CDT

We highlight factorial and split-plot designs in ARM. How to set up a factorial protocol, customizing the trial map for a split-plot trial, and the analysis options for multifactor designs in ARM.
