

## FREE ARM Software Webinars

### April Webinars: ARM & More

Our next set of webinars for 2021 focus on trial setup and introduce two ARM add-ins to extend the capabilities of the ARM system! The Tablet Data Collector (TDCx) is the professional data entry tool to bring ARM to the field, while Summary across Trials analyzes multiple trials, across locations or years.

---

#### Collect Data with TDCx Thu. Apr 8 at 10 AM CDT

Learn the ins and outs of using the Tablet Data Collector (TDCx) add-in to enter assessment data while in the field, as well as taking pictures, recording GPS coordinates, and reviewing data.

#### Labels and Barcodes in ARM Thu. Apr 15 at 10 AM CDT

Learn how to generate labels with ARM software. ARM has built-in labels for container, plot, seed packet and harvest labels, which can contain barcodes and subsamples. We will also demonstrate how to create your own custom labels!

#### Trial Map Randomization Thu. Apr 22 at 10 AM CDT

Learn how to maximize your use of the Trial Map tool in ARM, for creating the randomization of a trial. We show how to set the shape and numbering of the map and to manually adjust the layout via drag-and-drop. We also highlight the Quality features for optimizing the randomization.

#### Summary across Trials (ST) Basics Thu. Apr 29 at 10 AM CDT

Learn the basics of Summary across Trials (ST) add-in, to summarize multiple trials across years or locations. We will cover the 3 main pieces of an ST criteria (Trials, Treatments, Assessments), and introduce the output analysis.

#### ST Basics: Part 2 Thu. May 6 at 10 AM CDT

Pick up where we left off in the previous ST Basics webinar. We demonstrate additional examples of treatment and assessment criteria, and introduce graphing for the multi-trial analysis.
