March Webinars: What's New

ARM webinars have returned! We present new features in ARM, including a special session for the Geospatial Trial Map. Protocol writing, from beginner to more advanced topics, is also a focus.

Note the time change due to Daylight Savings; use the Calendar item we send.

Modernize Your Data: Storage and Sharing Tue. Mar 3 at 9 am CDT

Modernize how you store and share trial data. We introduce cloud storage services and demonstrate how to securely save ARM trials in the cloud. We also show how this can allow you to choose who can access the data.

What's New in ARM 2026 Tue. Mar 10 at 9 am CST

We present the features and changes made to ARM since the beginning of last year. This covers ARM release versions 2025.0 through 2025.5.

Introduction to Geospatial Trial Map Tue. Mar 17 at 9 am CST

Bring your trial locations to life with the new ARM Geospatial Trial Map! Learn how to open and navigate the Geospatial Trial Map, overlay your trial layout onto satellite maps, and export your map for seamless use in other systems.

Protocol Basics Tue. Mar 24 at 9 am CST

We cover the basics of setting up a protocol, including the treatment list, applications, and planned assessments. The protocol serves as a template for the research trials.

Going Further with Protocols Tue. Mar 31 at 9 am CST

Improve your ARM protocols with various standardization features, including study rules, SE's, and the trial location table.
