November Webinars

Our November webinars are here! We dive deeper into Summary across Trials (ST) functionality and cover ARM's data presentation features (graphs and reporting). We finish with a look to next year, to standardize your group's product lists and other ARM functions.

Going Further with Summary across Trials (ST) Wed. Nov 4 at 9:00 AM CST

We demonstrate more advanced functionality of ST than typically presented during "ST Basics". This includes Treatment functions like the "With Any" wildcard and exclusive match; considerations for assessment timing and repeat ratings; and the Treatment x Trial graph to investigate interaction.

Graphing and Reporting Wed. Nov 11 at 9:00 AM CST

In this session we focus on presentation of data, covering graphs and general reporting processes.

Sharing ARM Product Lists & Other Standardizations Wed. Nov 18 at 9:00 AM CST

Take ARM standardization to a whole new level! Learn about the options available for sharing ARM Product Lists and other standardization files across the ARM users at your company.
