October Webinars: Trial Summaries

Our next set of webinars for 2021 focus on trial summarization tasks, featuring a brand new webinar on transformations! We also cover weather data, graphing, and reporting best practices.

Working with Weather Data Tue. Oct 12 at 9 am CDT

Learn how to import weather data from your own weather station .csv file, and then visualize daily weather totals using the Weather Graph tool.

Data Calculations in ARM Thu. Oct 21 at 9 am CDT

Summarize recorded data with transformations and ARM Action Codes.

Creating a Graph Tue. Oct 26 at 9 am CDT

We demonstrate the graphing functionality and options within ARM.

Generating ARM Reports Thu. Nov 4 at 9 am CDT

We cover general reporting topics, including available reports, report sets, print preview, and print options.
