### September Webinars: Refreshers for Data

Our webinars return with a focus on data! These sessions are "refreshers", combining 2 or more topics normally presented in an entire hour, to get you quickly back up to speed! Check out our [previous recordings](#) for a deeper dive.

---

#### Import Weather Data and Assessment Photos Thu. Sep 4 at 9 am CST

We demonstrate how to bring in outside data like weather conditions and plot photos into ARM trials.

#### Data Calculations Refresher Thu. Sep 11 at 9 am CST

Create calculated columns to summarize recorded data with ARM transformations. Control corrections, yield conversions, rating scales, and general custom formulas are all discussed.

#### ARM & Statistics Refresher Thu. Sep 18 at 9 am CST

For our **150th** webinar, we provide a quick overview of our most popular webinar series: basic statistics with ARM. We cover data confirmation, review of AOV assumptions, and AOV analysis.

#### Graphing and Reporting Thu. Sep 25 at 9 am CST

In this session we focus on presentation of data, covering graphs and general reporting processes.
