September Webinars: All About Data

We are back with more ARM Webinars! This month is all about trial data, from importing external data like weather and images, to verifying trials coming in from the field, to calculations and statistics.

Import Weather Data and Assessment Photos Wed. Sep 9 at 9:00 AM CDT

We demonstrate how to bring weather information and plot photos into ARM trials.

Look Before You Leap: Verifying Your Research Data Wed. Sep 16 at 9:00 AM CDT

Learn effective techniques for reviewing trial information quickly. Identify any missing or inconsistent information provided by trialists (both internal and external) in a timely fashion with ARM!

Data Calculations Refresher Wed. Sep 23 at 9:00 AM CDT

Create calculated columns to summarize recorded data with ARM transformations. Control corrections, yield conversions, rating scales, and general custom formulas are all discussed.

ARM & Statistics, An Overview Wed. Sep 30 at 9:00 AM CDT

This presentation introduces statistics for research and their use within ARM. This sets the stage for our next sessions where we demonstrate the functions and tools within ARM software.

New this year: the impact new statistics features have on this process!
