ARM & Statistics webinar series

A repeat of our most popular webinar series, we explore the basics of ag research statistics in relation to ARM software, and how to use ARM tools to prepare and analyze your trial data.

Thursday, October 6 at 9 am CDT: ARM & Statistics: An Overview
Goal: Our presentation introduces statistics for research and their use within ARM. This sets the stage for remaining sessions of the week where we demonstrate the functions and tools within ARM software.

Tuesday, October 13 at 9 am CDT: Data Confirmation
Goal: Data confirmation is needed to ensure data quality, even before data analysis is considered. We will demonstrate the features in ARM for performing this step.

Thursday, October 20 at 9 am CDT: Data Review
Goal: Data review is needed to prepare the data for analysis and reporting. We will demonstrate the features in ARM for performing this step.

Tuesday, October 27 at 9 am CDT: AOV Analysis & reporting choices
Goal: We discuss the features and options of the AOV analysis in ARM, and the common questions that users typically face about the report.
