ARM & Statistics webinar series

A repeat of our most popular webinar series, we explore the basics of ag research statistics in relation to ARM software, and how to use ARM tools to prepare and analyze your trial data.

Thursday, September 12 at 9 am CDT: ARM & Statistics: An Overview
Goal: Our presentation introduces statistics for research and their use within ARM. This sets the stage for remaining sessions of the week where we demonstrate the functions and tools within ARM software.

Tuesday, September 17 at 9 am CDT: Data Confirmation
Goal: Data confirmation is needed to ensure data quality, even before data analysis is considered. We demonstrate the features in ARM for performing this step.

Thursday, September 19 at 9 am CDT: Data Review
Goal: Data review is needed to prepare the data for analysis and reporting. We demonstrate the features in ARM for performing this step.

Thursday, September 26 at 9 am CDT: AOV Analysis and Reporting Options
Goal: We discuss the features and options of the AOV analysis in ARM, and the common questions that users typically face about the report.
