

ARM 2015.6: Features Added After Version 2015.1

Gylling Data Management, Inc.

Simpler Assessment Data Column Properties

Column 5 Properties

Column ID: 5

Column Flags: Original

Min/Max entry: 0 100

Low/High value: 0.00 15.00

Descriptive Statistics

Refresh

LSD P=.05: 2.598

Standard Deviation: 1.686

CV: 54.387

Grand Mean: 3.1

P(Bartlett's X2): 0.004

P(Friedman's X2): 0.078

Skewness: 1.8499

Kurtosis: 2.6407

Replicate F.: 6.625

Replicate Prob(F): 0.6123

Treatment F.: 11.778

Treatment Prob(F): 0.0004

Does not meet assumptions of AOV: data has heterogeneity of variance/skewness/kurtosis

Fix

Outliers

Box-Whisker

> +/- 2 standard deviations from grand mean

> +/- 3 standard deviations from grand mean

Skip damaged assessments

Based on subsample values

Find Next

Removed less useful values, reduced height on screen

Assessment Editor

- New 'Across columns within subsample' cursor order *
- Tablet Data Entry mode: "Subsamples" data header label displays more columns
- Undo Assessment Comment, Barcode, GPS coordinate, and Damaged field changes
- Clear 'Damaged' flag from marked blocks *
- Several outlier search panel fixes

Convert Yield Automations *

- Column to Convert:
 - 'Current' unit auto-selected from Rating Unit
 - Sample size auto-filled with 1 PLOT if blank
- Sample size in Converted column auto-filled based on selected Desired unit

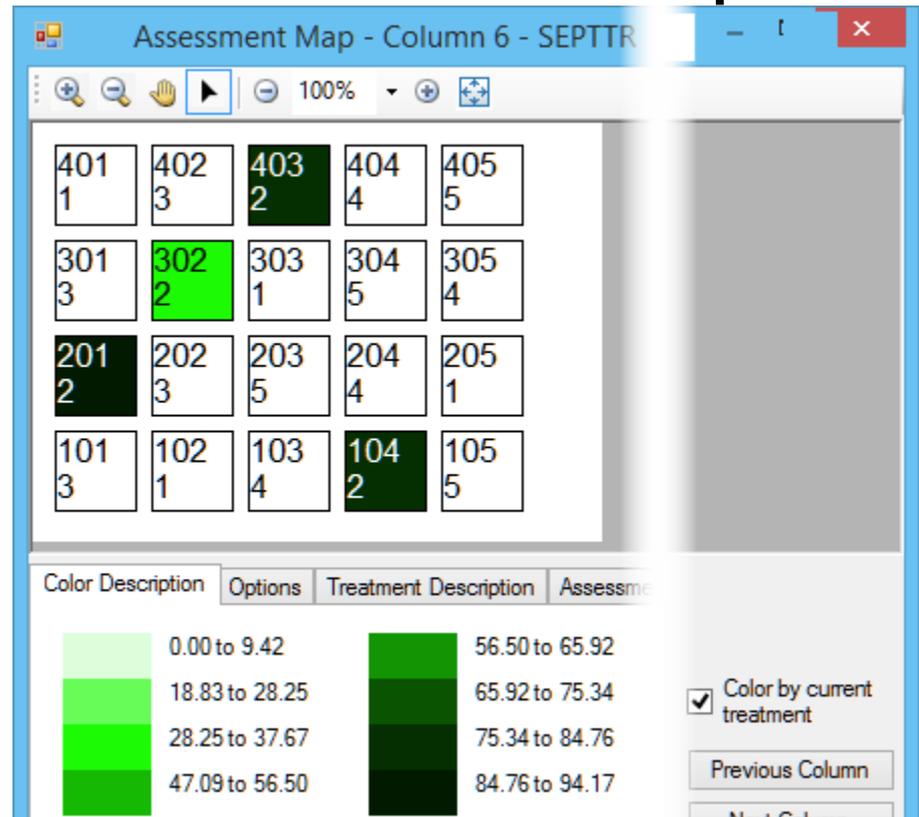

Assessment Editor *

- When choose formula from ARM Action Code list, are now asked to select original column(s) to transform
- Range and Row columns are now copied when select Trial Map Plot Description copy button in range/row numbered trial
- New warning when cursor moves to top of a new column in current cursor order if a key press will overwrite existing data₅

Assessment Map *

New 'Color by current treatment' option

- Easily review variation in each treatment
- Simpler to find position in each replicate for trial with many treatments

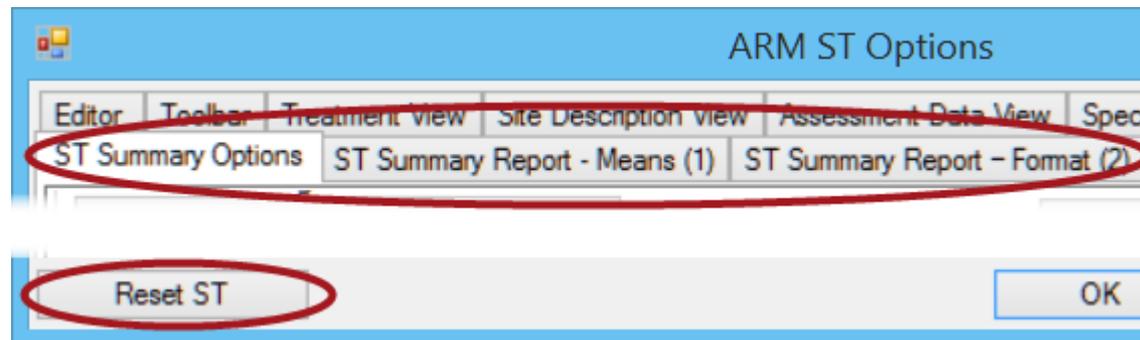

More Option Reset Buttons

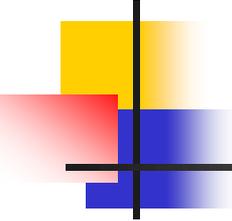

Additional "Reset" buttons to restore original default options

- Graph:

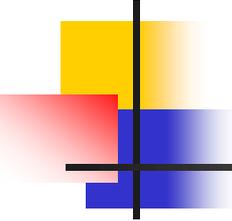

- ST:

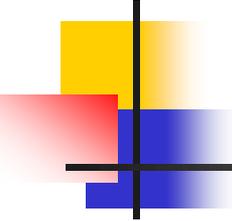

Print Reports

- Trial Status and Protocol Data Headers reports no longer print blank rows
- Technician license can print Data Collection, Map, and Trial Map reports
- Site Description Named View and Selected Tabs reports can be previewed using Report Preview tab

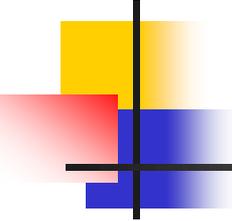

Print Reports *

- Option to:
 - Include median with treatment mean on single trial AOV report, and
 - Also include median on multi-trial ST (Summary Across Trials) AOV reports
- Median helps identify when a single value is "distorting" the mean

Mean vs. Median Example *

- Phytotoxicity data set: 0 0 0 5 20
Mean 5
Median 0
- % control data set: 50 90 90 90 95
Mean 83
Median 90
- "Balanced data set": 5 10 15 20 25
Mean 15
Median 15

Print Reports

- Changed dose-response graph so major and minor tick marks on X and Y axis are placed at better number increments *
- Fixed issue that sometimes images imbedded in comments did not print

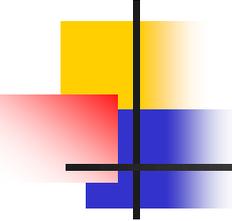

Spray/Seeding Plan Report *

Prints Settings Spray Volume and Mix Size for treatments lines where not specified:

Trt Line	Trt No.	Type	Treatment Name	Form Conc	Form Unit	Form Type	Rate	Rate Unit	Appl Code	Spray Volume	Volume Unit	Mix Size	Mix Unit
2	2	FUNG	Tub	250	G/L	EC	0.5	L/ha	ABC				
3	3	FUNG	Tub	250	G/L	EC	1	L/ha	ABC				
4	4	FUNG	Tilt 250	250	G/L	EC	0.5	L/ha	ABC				
5	5	FUNG	Mico 60	600	G/L	EC	1.5	L/ha	AB	250	L/HA	2.65	Liters

Reps: 4 Appl Code: A Plots: 2.5 by 10 meters

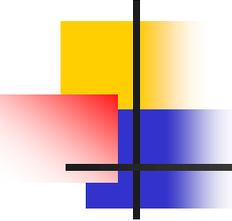

Trt No.	Treatment Name	Form Conc	Form Unit	Form Type	Rate	Appl Code	Spray Volume	Mix Size	Amt Product to Measure	Rep 1	Rep 2	Rep 3	Rep 4
3	Tub	250	G/L	EC	1 l/ha	ABC	200 L/ha	2.15 liters	10.75 ml/mx	101	202	301	402
1	Untreated Check					ABC				102	205	303	401
4	Tilt 250	250	G/L	EC	0.5 l/ha	ABC	200 L/ha	2.15 liters	5.375 ml/mx	103	204	305	404
2	Tub	250	G/L	EC	0.5 l/ha	ABC	200 L/ha	2.15 liters	5.375 ml/mx	104	201	302	403
5	Mico 60	600	G/L	EC	1.5 l/ha	AB	250 L/HA	2.65 Liters	15.9 ml/mx	105	203	304	405

Spray/Seeding Plan Report

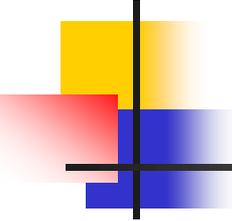

Canopy height rates

- Mix size printed for canopy height treatments is now multiplied by canopy height entered in Site Description
- Calculated mix size in the table heading is corrected for canopy height treatments

Labels Report

- Adjusted margin defaults for Avery 3451, 5160, 5161, 5163, L6103, L6105 to better fit label sheets
- Added Avery 5162 and 5735 labels
- Single-click now loads label defaults
- Force right and bottom margins to 0 when printing
- Metric label margins are more accurate
- Last label row on page not skipped for labels with vertical buffer between rows

Convert Yield

- Auto-fills 'Adjust to dry moisture percent' option from '% Standard Moisture' in Crop Description of the Site Description
- Converted yield is now 0 when original weight is 0 and adjusted moisture is missing

Study List Grid

- 'Auto-Size Column Widths' right-click menu item sizes grid columns based on contents

Selected	Study ID	Parent Protocol	Project ID	Official Trial ID
<input type="checkbox"/>	G-AI17_Fung	G-AI17_Fung		B2007RTJ02N25

The image shows a right-click context menu over a table row. The menu items are: Filter by G-AI17_Fung, Display All Fields, and Auto-Size Column Widths (highlighted). The table has columns: Selected, Study ID, Parent Protocol, Project ID, and Official Trial ID. The row being right-clicked contains: , G-AI17_Fung, G-AI17_Fung, and B2007RTJ02N25.

- New 'Official Trial ID' and 'Climate Zone' fields *

'Create Trial' Checks Plot Size

- Prompts if Treated Plot Width and Length in protocol description is different than in Settings

Protocol Description

Trial Establishment Guidelines | Crop/Pest Description | Soil | Application | Crop Stage at Appl.

Treated Plot Width: 3 m Country: FRA

Treated Plot Length: 8 m Climate Zone: EPOI

Treated Plot Area: 24 m² Experimental Unit: 1

ARM - WARNING

 The treated 'Plot' size 3 by 8 m entered in protocol description differs from Settings. Do you wish to continue creating the trial?

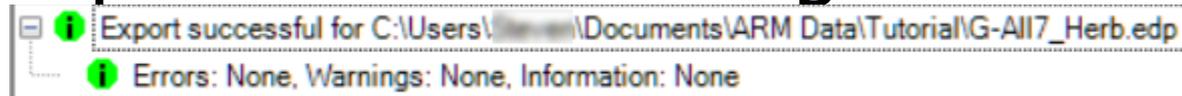

Select 'Yes' to create trial using 2.5 by 5 meters in Settings
Select 'No' to cancel trial creation

Yes No

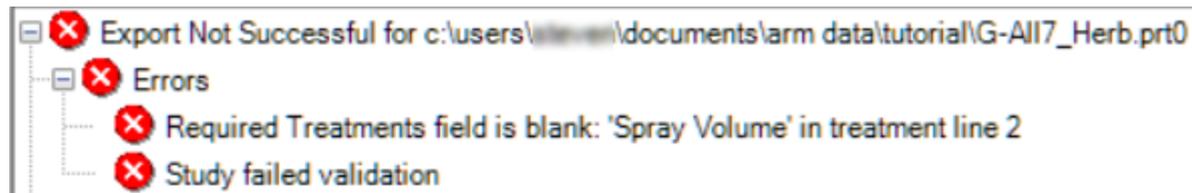

Export Success Messages

Message color indicates success

- 'Export Successful' is green

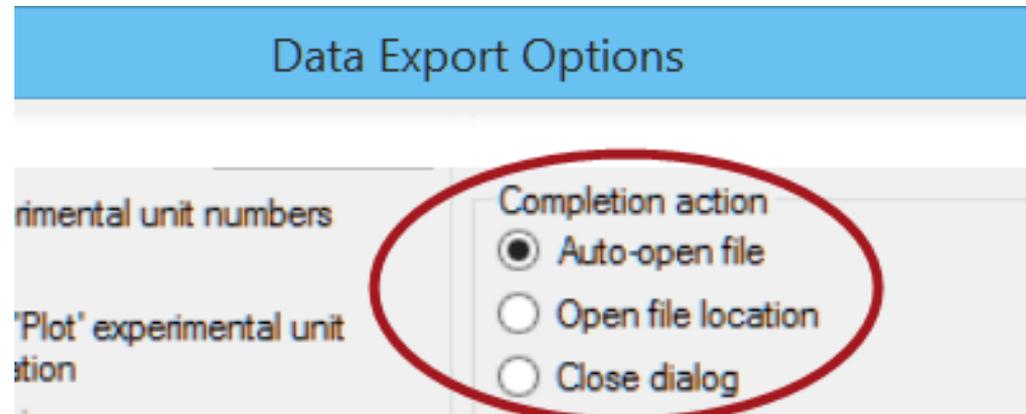

- 'Export not Successful' is red

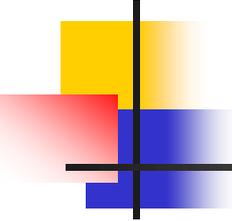

Data Export *

New 'Completion action" options:

- Auto-open exported data in the registered Windows program for selected file type (such as Excel for *.csv exports)
- Auto-open in Windows Explorer the folder containing exported data

Data Export

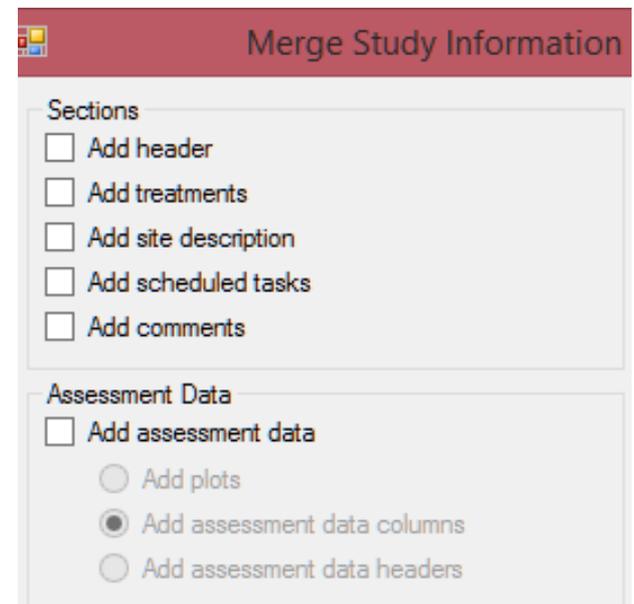

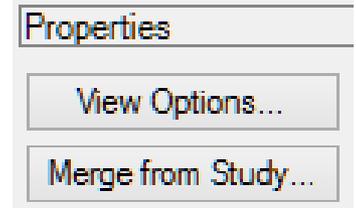

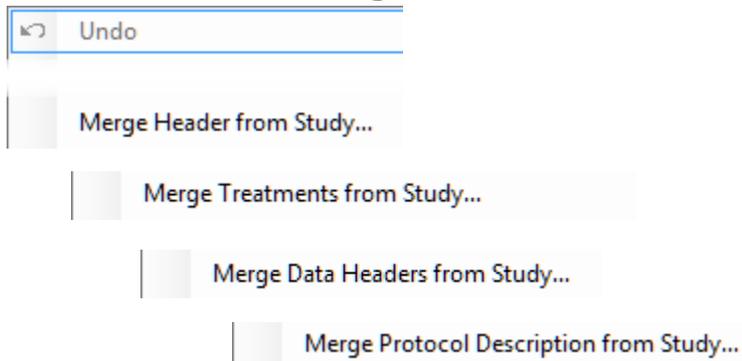

Export extended 'Plot' description:

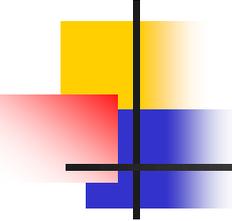

-	<i>Sub</i>	<i>Rep</i>	<i>Blk</i>	<i>Col</i>	<i>Plot</i>	<i>Trt</i>	Alt Plot ID	Barcode/RFID	Lat	Long
	1	1	1	1	101	2				
	1	1	1	2	102	5				

- New format option
- Use to include plot IDs and location information when exporting to other programs

Merge from Study *

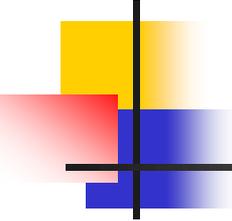

- New button on properties panels
- Use to ***add*** matching information from another study into current study
- Also on right-click menus

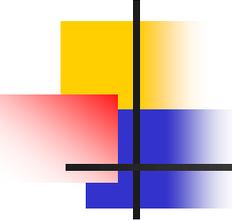

Merge from Study - Use to: *

- Build new protocol (trial plan) from a similar existing study
 - Even from a sponsor's customized protocol
- Add assessment headers (description)
- Add location, soil, and/or moisture from another trial in same field
- Combine 2+ identical trials at different locations into split-plot trial

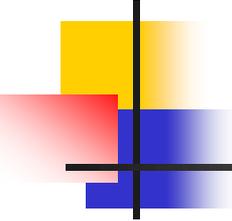

Merge Studies

- When merge protocol description, are now asked whether to update all merged dates to the current year *
- Simplifies using a previous year's protocol
- Select study to merge either from study list or by using Browse button

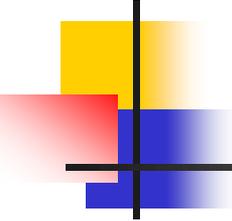

GDMdef Study Definitions

- Trial Year field in Header
 - Is auto-filled with current year
 - Is validated to help avoid invalid entries
- Changed Appl. Start Time and Moisture Time fields to time format, not free text
- Renamed 'Density' to 'Specific Gravity' in treatments editor

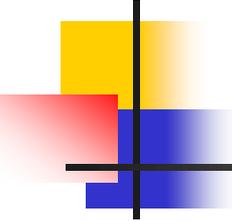

GDMdef Study Definitions

- New GPS Precision field in General Trial tab of Site Description
- 'CFU/g' displays in the Rate Unit list
- More rate units in Other Rate Unit list

Sponsor Customizations May be Set to Expire *

- Sponsors may 'expire' their customized study definitions for contractors:
 - ARM displays warning messages when customization is expiring
 - Are identified as 'obsolete' in About ARM
 - Cannot create protocol or trial
 - ***Can*** request customization again from sponsor after expired

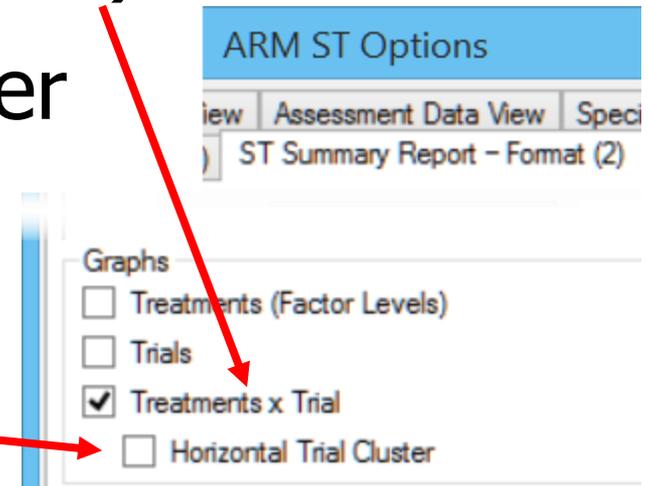

Other

- Support starting column number > 1 for Latin square trials
- New startup message warning when installed ARM program is obsolete (more than 2 years old)

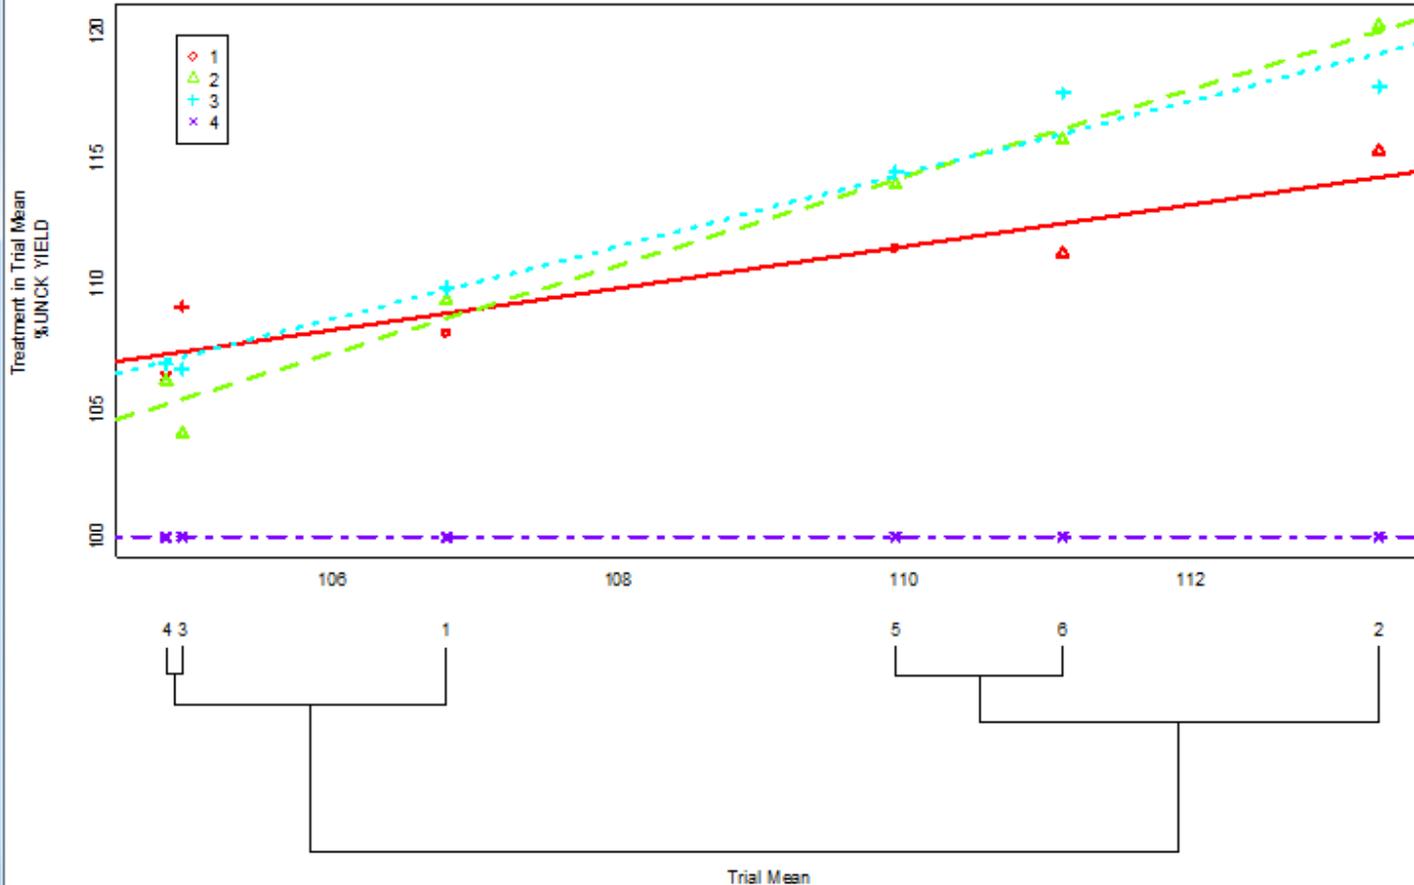

Summary Across Trials 2015 *

- Graph helps identify "location" (trial) groups when evidence of location effect (treatment x trial interaction) is detected
- Option to rotate the cluster analysis dendrogram, useful when analyzing many trials
- 'Print ST Summary' dialog displays faster

ST 2015 *

Treatment Stability and Trial Clusters for Grand Mean 11

Legend

	Trials	Means
4	ST-Exam4	104.8
3	ST-Exam3	105
1	ST-Exam1	106.8
