ARM - GPS Coordinates Mismatch

The GPS coordinates from the ARM Mobile file do not match the GPS coordinates already saved in the current trial.

Do you want to keep the current GPS coordinates, or replace them with the GPS coordinates from the ARM Mobile file?

Current GPS: 39.0402, -90.1446

ARM Mobile GPS: 44.2923227, -96.8190268

ARM Tips & Tricks: Translate ARM Mobile with Chrome

Use Chrome to translate to ARM Mobile to many different languages. *Unfortunately, Safari does not currently support translation.*

1. Click the "three dots" option button in the upper right corner of the browser.
2. Select Translate.
3. In the address bar, click on the Translate Settings button.
4. Select "more languages" and then select the language you wish to translate to.

New course in the ARM Academy: **Basic Statistics with ARM**

In this video series, we explore the basics of ag research statistics in relation to ARM software and how to use ARM tools to prepare and analyze trial data. You can follow along as we demonstrate how to confirm the values entered into ARM trials, review the data for assumptions of AOV, and then perform an analysis with the AOV Means Table report.
